

HAMZA FIAZ

AI/ML & Full-Stack Development Intern Candidate

+92-3080039050 · hamzafiaz.dev@gmail.com · github.com/hamzafiazdev · linkedin.com/in/hamza-fiaz · hamzafiazdev.github.io/portfolio1

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

COMSATS University Islamabad, Sahiwal Campus · CGPA: 3.05 / 4.00

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: Bootstrap, OpenCV, Streamlit, Laravel

AI / ML: LLM APIs (OpenAI, Google Gemini), OpenAI Agents SDK, NLP, Speech Processing, AI Automation

Cloud & Data: AWS (S3, EC2, Athena), GCP, REST API Integration

Databases: MySQL

Dev Tools: Git, GitHub, Version Control, CI/CD basics

PROJECTS

AI-Powered Hotel Booking Platform | *Hostily*

2025

 [GitHub Repo](#)

- Engineered an AI hotel booking platform using Laravel, integrating a conversational chatbot and recommendation engine that personalized room suggestions and reduced guest query resolution time.
- Architected end-to-end booking flow with real-time AI assistance, improving user engagement and streamlining the accommodation selection process.
- Deployed recommendation algorithms achieving context-aware suggestions, demonstrating applied ML integration in a production-ready web environment.

AI Voice Agent | *Personal Project*

2025

 [GitHub Repo](#) ·  [Live Demo](#)

- Built a real-time voice-enabled AI assistant using Python, OpenAI Agents SDK, and speech processing pipelines, enabling natural, low-latency conversational interactions.
- Designed and integrated multi-turn dialogue management, allowing the agent to handle dynamic booking queries and provide AI-driven recommendations autonomously.
- Optimized speech-to-text and text-to-speech pipelines, reducing response latency and improving interaction quality across diverse user inputs.

AI Resume Analyzer | *Personal Project*

2026

 [GitHub Repo](#) ·  [Live Demo](#)

- Developed an ATS-compatibility analyzer leveraging AWS infrastructure and NLP techniques to evaluate resumes against job descriptions and surface missing keywords.
- Implemented automated skill-matching and keyword gap analysis, delivering actionable resume improvement suggestions through an interactive insights dashboard.
- Integrated scoring logic that quantifies ATS alignment, enabling users to iteratively optimize resumes and increase shortlisting probability.

AI Image Caption Generator | *Personal Project*

2025

 [GitHub Repo](#) ·  [Live Demo](#)

- Built an AI-powered caption generator using Python, Streamlit, and Google Gemini API, capable of producing descriptive, context-aware captions for uploaded images (JPG, JPEG, PNG).
- Designed a responsive Streamlit UI handling image ingestion, API calls, and real-time caption rendering, reducing end-to-end generation time.

- Demonstrated practical integration of multimodal LLM APIs in a deployable web application, showcasing full-stack AI development competency.

ACHIEVEMENTS & HIGHLIGHTS

- Delivered 4+ end-to-end AI applications integrating LLM APIs, speech processing, and cloud services — all published on GitHub (github.com/hamzafiaz) with documentation and deployment configurations.
- Applied AWS (S3, EC2, Athena) and GCP in project infrastructure, demonstrating hands-on cloud deployment experience beyond academic coursework.
- Consistently self-directed in learning emerging AI tools (OpenAI Agents SDK, Google Gemini, OpenCV), translating new technologies into functional, user-facing products within weeks of discovery.
